Trust & Trend

A&N Property is a Bulgarian company with its headquarters in Plovdiv. We are specialists in renovation and revitalisation projects. We deliver innovative and sustainable solutions that justify your trust in us. We believe that not only the creative realisation and the technical transaction is essential, but also the total environment of the project. We offer a complete package of all related services. This includes a comprehensive consultation, also in financial and bureaucratic matters, starting from the inception and design of the project until its construction.

We look after our clients in a complete manner. The wishes, demands and requirements of our clients have always top priority. Our aim is to provide our clients a comprehensive package of services starting from inception up to the realisation. The expectations of our clients determine in conjunction with the social and geographical background the room arrangement and financial concept.

Our aim is to keep, renovate and revitalise buildings that are sometimes left to decay. By this way we intend to create new dwelling space of high-quality for people without supporting the permanent expansion of new-builds in greenland.

Prerequisite for this is our technical know-how gained during revitalisation projects and the selection of optimal locations and highly qualitative objects, in order to commercialize your property in the best possible manner.

Based on our many years of experience, we are able to solve all kinds of problems during revitalisation projects that are of difficult and tricky nature. We have the required in-depth knowledge and are also in the position to apply traditional craftsmanship.

*to create the new,
with future-oriented prospects
to give rise to changes
without leaving worth proven concepts*
